DATABASE SYSTEMS

DESCRIPTION

This course will discuss principles of database systems including database architecture, relational algebra and calculus, SQL, database design, normal forms, query processing, transaction processing, security, backup and recovery. Programming projects will be used to demonstrate these concepts.

READING

- Thomas Connolly and Carolyn Begg, *Database Systems: A Practical Approach to Design, Implementation, and Management*, 6th Edition, Addison-Wesley, 2014. ISBN 978-013-2943260
- Numerous handouts

The textbook has been placed on reserve in the library.

GRADING

Exams (75%)

Lowest grade of the first two exams	17%
Highest grade of the first two exams	28%
Final Exam	30%

Projects (25%)

EXAMS

Students must attend and complete all three exams. No exceptions. There are no make-up exams. After completing three exams, the lowest of the first two exam grades will be computed at 17% of your final grade and the highest of the first two exams will be computed at 28%. The final exam will be 30% of your final grade. Missing exams will receive a zero grade and will not receive the lower percentage.

You are required to comply with the exam procedures available on Blackboard at *Exams/Exam Procedures*

Exams are scheduled for March 7, April 23 and the final exam scheduled by the register in May.

PROJECTS

You must complete all projects. Missing projects will receive a zero grade. No projects will be accepted after the cutoff date. Points will be deducted daily for late projects. Project submission guidelines and due dates are available on Blackboard and in the project handout.

OFFICE HOURS AND E-MAIL

If you have questions that cannot be taken up in class, you may schedule an appointment to see me during my office hours posted on Blackboard or contact me by e-mail at *Daniel.Leavitt@qc.cuny.edu*

BLACKBOARD

Reference Blackboard frequently for the syllabus, class announcements, readings, topics for each class, projects, handouts, exam study guides, your grades, video tutorials and user guides.

SOFTWARE

Programming projects will utilize Oracle Database Express Edition 11g Release 2. The use of other database systems must receive prior instructor approval. Documentation and videos to install and develop in Oracle is available on Blackboard.

ACADEMIC INTEGRITY

Projects and examinations must represent your own work. Group exams and projects are not permitted. You should neither copy another student's project or exam nor permit another student to see your work. You can be asked to perform specific procedures and operations in the presence of the instructor. A student who submits an exam or project that is too similar to another student's work will receive a **ZERO**. Additional penalties may be imposed. Students found guilty of any form of academic dishonesty such as plagiarism or cheating on an exam or project, are subject to discipline, including, but not limited to, failure in the course and suspension or dismissal from the College.

You are required to comply with the CUNY Policy on Academic Integrity available at *http://www.cuny.edu/about/administration/offices/la/Academic_Integrity_Policy.pdf*
